

25 Years Service
William (Bill) Hall, Project Manager – Principal
Information Technology Department

Bill has actually worked at the District a total of 35 years. He had worked 2 years as a part time computer operator and eight years as a full time employee before he left for a position in the private sector. When he returned to the District in 1984, he was hired to manage the Computer Management Division. Since then, he has held the positions of IT Planning Director and Director of Networking and Security. Bill obtained his Project Management Professional certification in 2008 and is currently the Program Manager for the Comprehensive Everglades Restoration Plan (CERP) Information and Data Management. In this key role, he is the District liaison to the Army Corps of Engineers for CERP Information Technology.

During his tenure, Bill was empowered to:

- Develop our first Permits Tracking System in 1976
- Review and accept the software on our SCADA System in 1976 from General Dynamics
- Implement the use of computer terminals in 1979
- Co-author the second generation of our SCADA System Capability Specifications
- Implement networked personal computers and set up our wide area network
- Connect our agency to the Internet in 1990 and obtained our sfwmd.gov domain including e-mail
- Contribute to the development of our IT Policies and IT Strategic Plan
- Move the agency to Oracle for enterprise-wide data management

Thank you for all you've done to advance information technology throughout the years.
