

25 Years Service Recognition

Ed Maciejko, Engineering Specialist IV

Orlando Regulatory Division

Ed's 25 years of service have been dedicated to the Regulation Department. Ed began his career with the District in West Palm Beach as a Staff Engineer reviewing drainage permits. After two years of absorbing the joys of permitting, he moved to the Field Engineering Division and worked as a Field Engineer, eventually becoming a Supervising Professional and then on to Senior Engineer. While working 15 years in West Palm Beach some of Ed's more notable accomplishments were:

- His help in development of the construction tolerances.
- The development of the engineer's construction completion certification program (that we use today).
- And also Ed was a founding member of the Palm Beach County Environmental Appeal Board.

While working in the Martin/St. Lucie Service Center for the next five years Ed accomplished:

- Closing out a Martin Downs development project and serving as the Martin County FEMA Public Assistance Coordinator for Hurricanes Frances and Jeanne.

In the last past five years, Ed has ventured further north to the Orlando Service Center, and he hasn't slowed down one bit. Ed has successfully closed out 1,000 plus construction projects. Ed troubleshoots regulatory issues almost daily and effectively manages constituent issues and challenges. With Ed's expertise and knowledge, he has not only been a District value-focused employee, but a true public servant.
