

25 Years Service

Dona Spry – Regional Tech Support Analyst North Region – Orlando Service Center

Dona was hired on August 30, 1982 as Supply Clerk in the West Palm Beach Field Station Stores office. With a blazing typing speed of 30 words per minute it was not long until she worked her way up to Assistant Storekeeper and then on May 30, 1991 she was promoted to Storekeeper. The entire time she worked at the field station she continued her educational career learning about computers and the software that makes them work. From there she attained the title of Administrative Technician reflecting her interest in technology and sending her down the path of the dark side --- Information Technology.

Her career in Information Technology started as a Computer Systems Technician and Asset Manager in 1994. Two years later Dona relocated with her family to Orlando. Dona then transitioned into a technical support role for the District's northern region. In this role there is nothing she is not willing to do to support her regional customers.

Dona is married to Shawn Spry, Industrial Electrician, at the Kissimmee Field Station. They have two children Erin and Allison. Congratulations, Dona, on 25 years service with the District.
