

## **25 Years Service**

### **Lambert “Joe” Granie Lead Stationary Diesel Engine Operator/Mechanic Ft. Lauderdale Field Station**

Joe, as everyone calls him, began his tenure with the District on November 16, 1981, as a Diesel Trades Helper at the S-140 Pump Station. He continually moved up the ranks to a lead Diesel Engine Operator on October 1, 1993.

During this time, Joe acquired the necessary knowledge and mastered the operations and uniqueness of each of the five Pump Stations in Ft. Lauderdale’s area of jurisdiction. Joe’s friendly and easy going attitude makes him a pleasure to work with.

Joe is very artistically inclined, as can be seen in the Ft. Lauderdale Field Station’s Administrative Office where a beautiful painting hangs of a manatee painted by Joe. Joe gladly presented this painting to the Administrative staff as a new office gift.

He plans to move to north Georgia and make furniture and cabinets after he completes his thirty years and his children complete college.

Joe says, “I just really like doing my job.”
