

25 Years Service

Kevin Rodberg-Section Leader Model Processing

Kevin started at the District as a Temporary Student Aid in the Electronic Data Processing Division of Technical Services. IT as we call it today. He was hired as a full time employee in December of 1983 as a Technician in the Ground Water Division of Resource Planning doing computer programming, database work, statistics and computer aided design.

Kevin was promoted to a professional position in 1986 working primarily with databases. Around 1995 Kevin's primary focus began to revolve more upon programming for the modeling being done in the department. By May of 2004 he had been promoted several times over the years and was currently a Specialist Systems Analyst/Programmer for the Technology Resource Team when he was appointed as the Interim Division Director of the Technology Resource Team in Water Supply.

After working in this capacity for 9 months, Kevin was assigned as a Section Manager for Model Processing Section in Resource Evaluation and Sub-Regional Modeling of the Water Supply Department.
