

30 Years Service

Donald Polak, Planner/Scheduler

West Palm Beach Field Station
Operations & Maintenance Department

Don Polak started at the District 30 years ago on October 2, 1977. He pumped gas at the old West Palm Beach Field Station's gas house, which was located where Headquarters is today.

Six months later he transferred to the sign shop as a sign painter and worked there 8 years before becoming a supervisor over the sign shop in July 1986. One of his many sign shop jobs is making your dais name plates and the employees' office name plates. In 1989 the Paint & Body Shop was also placed under Don's supervision. He supervised both shops for the next 11 years.

On June 15, 2000, Don became a Planner/Scheduler and he operated the sign shop in addition to planning and scheduling for the Maintenance Support Facility. Don currently plans and schedules workloads for the entire District's major gate overhauls. In addition, he coordinates all the operational needs for the Machine Shop, Gearbox Shop, and Weld Shop.
