Executive Office

Mr. Bromwell presented information on the Herbert Hoover Dike Independent Technical Review. Mr. Bromwell reported on the Scope of Work.

Mr. Bromwell reported on the construction flaws on the original dike (based on Dam Safety Regulations). There was no selection of fill materials. There was no compaction to achieve suitable engineering properties. There was no seepage control through fill or foundation. The ditches on both sides of the dike exposed high porosity foundation materials.

Mr. Bromwell provided information on the early seepage problems and the seepage and Dike Stability.

Mr. Bromwell reported on the repair history of the dike, the hydrology and the hydraulics issues with the dike as well as possible hurricane erosion.

Mr. Bromwell reported on the current status of improvements to the Herbert Hoover Dike. Mr. Bromwell presented information on the eight different reaches.

Mr. Bromwell also provided recommendations for the repairs to the Herbert Hoover Dike. Mr. Bromwell said the likelihood that the dam may fail before effective repairs are completed is sufficiently high to warrant for preparing for failure in tandem with attempting to prevent it. He also reported that an Emergency Action Plan should be comprehensively reviewed and updated.
Mr. Lindahl had questions regarding levees and dams and their design standards. Mr. Bromwell provided additional information on the designs standards.

Col. Robert Carpenter, Commander of the U.S. Army Corps of Engineers, provided information about his educational background and his career with the United States Army. His mission is to provide public safety and improve the quality of life for all Floridians. He said he does not believe Mr. Bromwell's report represents the facts in a responsible way. He assured all that the Herbert Hoover Dike is not going to fail without some extraordinary natural event.

Col. Carpenter provided additional information on the report that was presented. He wanted to be clear on two items.
1. Public Safety is and will always be the highest priority of the United States Army.
2. There are significant problems with the Herbert Hoover Dike that require both agencies to work together to minimize the short-term problems and alleviate problems in the future.

Col. Carpenter then presented information on the Corps Strategy since 1986. He reported on the eight reaches. Col. Carpenter reported on Governor Jeb Bush's nine requests which were:
1. Lowering the lake level during hurricane season.
2. Remove power poles from the toe of the dike.
3. Inspections.
4. Having the materials, equipment, and personnel for emergency repairs.
5. Acceleration of repairs and rehabilitation.
6. Reevaluate design to provide adequate protection.
7. Engineering solutions for wave action, storm surges and seepage-related erosion.
8. Request Congressional Authorization to Improve Dam Standards.

Public Comment: Wayne Nelson, representing FADE Inc., provided comment on this item and the diagram of the 2005 Erosion Damages that was presented by the USACE.

Public Comment: Mayor Clarence Anthony representing the citizens of South Bay, FL provided comment on the Herbert Hoover Dike report. There are concerns from his citizens about the lake level and the dike.

Public Comment: Commissioner Michael DiTerlizzi representing Martin County, provided comment on this item. Martin County Commissioners voted to support the SFWMD Governing Board's efforts on this issue.

Public Comment: Mark Perry representing the Florida Oceanographic Society provided comment on this item. He believes we need to get Lake Okeechobee's water levels lowered.

Public Comment: Alex Larsen, Loxahatchee, FL, provided comment on this item. She opposes building a dam.

Public Comment: Rosa Durando, representing the Audubon Society, Lake Worth, provided comment on the Herbert Hoover Dike Report. Ms. Durando opposes building a dam.

Public Comment: Jamie Furgang, representing the Audubon Society of the Treasure Coast, provided comment on the Herbert Hoover Dike and the lake levels of the dike.
Mr. Collins commented on the Lake Okeechobee water levels and the 1999 report. Mr. Collins said the problem is funding. He said we need to work together with the USACE and expedite what is agreed upon.

Mr. Wade provided comment on the concerns of the citizens around the lake and what is the criteria on the evacuation process. Mr. Wade believes staff need to work now with the professionals and the USACE, and coordinate a criteria for evacuation to be brought back to the Board next month.

Mr. Lindahl provided comment on the protection of the citizens. He spoke on his concerns about the dike. He commented on both reports presented on the Herbert Hoover Dike and the releases of the water from the lake. Mr. Lindahl believes we need to move ahead and recognize what staff need to do in order to achieve the level of safety to protect our citizens.

Ms. Bague expressed gratitude to Col. Carpenter. She is confident District staff and the USACE can work together and get the issues resolved.

Mr. Gutierrez commented that District staff and the USACE need to focus on determining what needs to be done and move forward.

Ms. Wehle provided the directions from the Board to staff:
1. Staff need to work with the Governor's office, our Congressional leaders and local partners to request from Congress an increase in funding for repairs to the Herbert Hoover Dike.
2. Staff are to provide technical assistance, where needed or when requested, by the USACE to look at different scenarios in breaches by June 1, 2006, so local governments can appropriately plan for their emergency evacuation scenarios.
3. Staff are to work with the USACE where there may be diversions and bring back a status report to the June Governing Board meeting.
