

## Deployment of Leased Dell Computers Team

Andrea Allen	Karen Kempf	Kathy Santamarina
Ken Beyers	Mitch Krolick	Jeremy Silver
Susie Campbell	Todd Nesst	Dona Spry
Vince Faraone	Megan Normann	Tony Vitani
Marlene Fink	Matt Padgett	Mike Wedding
John Halverson	Mike Roddy	Pat Westmoreland

The members of this team are being recognized for their outstanding effort and dedication to the deployment of leased Dell computers.

The team organized and achieved the largest computer deployment ever undertaken at the South Florida Water Management District. This deployment required literally 24/7 support for nearly 6 months. Every piece of software on every computer was checked for license compliance. The data on every computer was copied at the last minute before the computer replacement to reduce data loss and down time for the person receiving the new computer. This copying process was often done on the weekends and during the night before a deployment.

A total of 2041 new Dell computers were delivered and installed. In addition, 470 unique software titles were installed, 5203 software licenses were verified, 471 desktop printers and 91 network printers were delivered and installed. The District is now 100% compliant with all of our software licensing.

We appreciate your outstanding efforts and dedication to the District.
