2009 Team of the Year
Master Agreement Negotiation Team

Since the year 2001, The Master Agreement Team for Everglades Restoration has been under negotiations. The negotiations have embedded and flowed for the past eight years; however, for the last year, The Master Agreement Team has been fully engaged.

The completed Master Agreement that the Governing Board approved is a superior product that provides a substantial value to the residents of South Florida and sets the path for critical construction on Everglades restoration.

This team spent hundreds and hundreds of hours meeting with the United States Army Corp of Engineers staff to diligently represent the interests of the South Florida Water Management District.

This team's work has established new momentum that will provide for a lifetime of Everglades Restoration.
