
ACKNOWLEDGMENTS

The South Florida Water Management District gratefully acknowledges the many professionals who have contributed to the *2011 South Florida Environmental Report*. As reflected below, the three-volume main report was developed by over 200 authors and contributors from the agency, the Florida Department of Environmental Protection, and other supporting agencies and organizations with expertise in the various topics of this report. The professionalism and dedication of chapter leads, authors, and contributors are highly recognized.

Production, Review and Project Support

Project Team: Led by SFER Project/Production Manager Stacey Ollis, the 2011 SFER was a collaborative effort across multiple agencies and disciplines representing over 200 team members. The management of Volumes I and III is centered in the District's Restoration Sciences Department under the leadership of Garth Redfield and Stuart VanHorn, respectively. The Volume I staff works closely with the Florida Department of Environmental Protection's Division of Environmental Assessment and Restoration to jointly coordinate Volume I, Chapters 3A and 3B, and Volume III. The District's Budget Office provides oversight and support for the development of Volume II under the leadership of David Gilpin-Hudson. Along with the significant contributions of these project management teams, this large, multidisciplinary document could not be produced without the guidance of our agencies' department, division, and executive managers.

Editorial and Production Team: To organize the development of this extensive report under tight deadlines, sound project management and close teamwork by the SFER production management team is required throughout the entire production process. Under the strong leadership of the SFER Project/Production Manager, Stacey Ollis, the exceptional cooperation and productivity of the 2011 SFER production team, especially Trudy Stein and Nathan Yates, are respectfully acknowledged. The outstanding work performed by the SFER technical editors, Shauna H. Graham and Karen King McCallum, and the SFER Executive Summary graphic designer, Gail Marcarelli, from Aquent, Inc., under contract to the District is also immensely appreciated. For their support in producing the 2011 SFER Executive Summary, many thanks are extended to the District's Department of Public Information staff.

Peer Review: The depth of knowledge and experience of the expert panel assembled for the 2011 SFER peer review is greatly valued. This year's panelists provided insightful and thorough scientific peer review in the major subject areas covered in Volume I. The SFER production staff is also recognized for assistance in overseeing this review process.

Other Contributors: The extensive amount of data and other technical information is largely supported by divisions of the District's Restoration Sciences Department. Many individuals throughout these divisions have contributed to the essential data collection, monitoring, analyses, validation, and technical assessments for multiple Volume I and III chapters and appendices. They play a key role in the success of this report, and their efforts are deeply appreciated. Project managers and chapter authors are also sincerely recognized for producing the 2011 SFER Consolidated Project Report Database, managed by Andrew J. Kowalsky III.
