# SPECIFIC PURPOSE SURVEY

# STAFF GAUGE AND REFERENCE ELEVATION REPORT

This document contains a surveyor's report and certification as to the accuracy of the methods used to determine NAVD88 elevations for staff gauges and stilling well reference elevations set by CivilSurv Design Group, Inc.

SOUTH FLORIDA WATER MANAGEMENT DISTRICT INFRASTRUCTURE MANAGEMENT BUREAU - SURVEY AND MAPPING SECTION STAFF GAUGE INSTALLATION & RECALIBRATION SERVICES HYDRAULIC & HYDROLOGY, DISCIPLINES #8, CONTRACT #4600002182

# Specific Purpose Survey Report Purpose:

To assemble, install and calibrate 40 staff gauges to NAVD88 datum; and establish a benchmark – also referred to as a reference elevation (RE) – on the platform of associated headwater and tailwater telemetry stations. Field Surveys for these gauges completed during the period of 4/23/13 through 4/24/14.

# Leveling methods:

Leveling methods: Conventional differential leveling was performed in accordance with Florida Administrative Code 5J-17.051(3)(b)15.a. The maximum error of closure for this type of leveling is 0.05' x  $\sqrt{}$  Distance in miles. The error of closure achieved for the leveling performed meets or exceeds this specification.

# **Equipment used:**

Wild NA-1

# **Vertical Datum:**

The staff gauges listed in this report have been correctly calibrated to the North American Vertical Datum 1988 (NAVD88) as of April 24, 2014.

### **Sources of Data:**

Benchmarks were provided by South Florida Water Management District. Information on the specific benchmarks can be obtained from the S.D.E.R.A. Website: <u>http://my.sfwmd.gov/sderawebapp/gis/sderamain.jsp</u>

### Surveyor's Note:

Vertical closures obtained by comparison to converted existing NGVD'29 reference elevation tags. Party Chief and Field Book information reported herein is for consultant reference only. Each site had multiple crew visits, and stamping date is one of the on-site days.

### Surveyor's Certificate:

This staff gauge elevations and stilling well reference elevations specific purpose survey (consisting of a cover, index and 45 numbered pages) is certified to the South Florida Water Management District. This report is not valid without the original signature and raised seal. All staff gauges contained in this Surveyor's Report were calibrated to a vertical accuracy of  $\pm 0.05$ .

This is to certify that this staff gauge elevations and stilling well reference elevations specific purpose survey report was made under my responsible charge and meets the minimum technical requirements as set forth in Chapter 5J-17 of the Florida Administrative Code.
