## ACKNOWLEDGMENTS

---

The South Florida Water Management District gratefully acknowledges the many professionals who have contributed to the *2010 South Florida Environmental Report* (2010 SFER).

**Authors:** As reflected below, this two-volume report was developed by over 200 authors and contributors from the South Florida Water Management District, the Florida Department of Environmental Protection, and other supporting agencies and organizations with expertise in the chapter topics of this report. Along with these many individuals, the professionalism and dedication of chapter leads and contributors are thankfully recognized.

## Production, Review and Project Support

**Project Team:** Led by SFER Project/Production Manager Stacey Ollis, the 2010 SFER was a collaborative effort across multiple agencies and disciplines representing over 200 team members. The management of Volume I is centered in the District's Restoration Sciences Department and overseen by Garth Redfield, with the support of Linda Lindstrom, Dee Azeredo, Deborah Drum, and Julianne LaRock. The Volume I staff works closely with the Florida Department of Environmental Protection's Water Quality Standards and Special Projects Program to jointly coordinate the creation of Volume I, Chapters 3A and 3B, and associated appendices. The District's Budget Office provides oversight and support for the development of Volume II under the leadership of David Gilpin-Hudson. Along with the significant contributions of these project management teams, this large, multidisciplinary document could not be produced without the guidance of our agencies' executive managers.

**Editorial and Production Team:** To organize the development of this lengthy report under tight deadlines, sound project management and close teamwork by the SFER production management team is required throughout the entire production process. Under the strong leadership of the SFER Project/Production Manager, Stacey Ollis, the exceptional cooperation and productivity of the 2010 SFER production team, especially Trudy Stein and Nathan Yates, are respectfully acknowledged. The outstanding work performed by the SFER technical editors, Shauna H. Graham and Karen King McCallum, and the SFER Executive Summary graphic designer, Gail Marcarelli, from Aquent, Inc., under contract to the District is also immensely appreciated. For their support in producing the 2010 SFER Executive Summary, many thanks are extended to Brenda Duffey, Jan Loftin, Patrick Lynch, Ellen Negley, Patti Nicholas, and Barbara Ross of the District's Department of Public Information.

**Peer Review:** The 2010 SFER peer review was conducted by six experts: Dr. Neal E. Armstrong, University of Texas at Austin; Dr. Joanna Burger, Rutgers University, Piscataway, New Jersey; Dr. JoAnn M. Burkholder, North Carolina State University, Raleigh; Dr. Otto R. Stein, Montana State University, Bozeman; Dr. Ellen van Donk, Netherlands Institute of Ecology; and Dr. Robert C. Ward, Colorado State University (emeritus), Fort Collins. All the panelists provided insightful and thorough scientific peer review in the major subject areas covered in Volume I. The depth of knowledge and experience of this expert panel is greatly valued. The SFER production staff, including Linda Davis, is also recognized for its assistance in overseeing this year's streamlined, peer-review process.

**Other Contributors:** The extensive amount of data and other information provided throughout Volume I is largely supported by the divisions of the District's Restoration Sciences Department. Many individuals throughout these divisions have contributed to the essential data collection, monitoring, analyses, validation, and technical assessments for multiple Volume I chapters and appendices. They play a key role in the success of this report, and their efforts are deeply appreciated. Project managers and chapter authors are also appreciatively recognized for updating the 2010 SFER Consolidated Project Report Database, managed by Andrew Kowalsky.
